763  20May09 When subdividing activity codes into pseudo codes to the
CARMM program, these are the
763!  places where they also
764                  will need to be added:
765                          Below where %addActvCodeToMxMail is being
called in (appends the
765! psuedo code to the mix mail map)
766                          Below where Proc format is formatting all
the activity codes
767                          In the excel file (ActivityCodesMaster
03AUG09.xls)
768                          In the sas code of "mapclassRecast.sas"
NOTE not needed for delivery
768!  cost model, as not
769                  using DMM field.
770              In the mixed mail/direct actv code match file
"MxMailCode.csv" - add new activity
770!  codes for Std Mail
771              Be sure to use the correct field in ActivityCodeMaster -
NewCRAProd
772                                  select KL.*, ac.NewCRAProd as class2
773              FY25: Barcodes -Intelligent Mail Indicia (IMI) replaces
Information Based Indicia
773!  (IBI)
