

List of FY 2023 QC Minimodel Programs

Folder	Contents	Description
Common\SUPER\src (Supervisor code)	compile.bat Delvars.f90 GP.f90 Parmtab.f90 Print_hh.f90 Readhead.f90 Readparm.f90 Supervis.f90 Timing.f90	Compile script Supervisor delete vars subroutine Supervisor global parameter definitions Supervisor parameter print subroutine Supervisor household print subroutine Supervisor header file read subroutine Supervisor parameter file read subroutine Supervisor driver Supervisor time of run subroutine
Common\SUPER\src\modules (Supervisor module)	Addvar.f90 Errormsg.f90 Free_mem.f90 Global.f90 Globparm.f90 Iodata.f90 Isnewpg.f90 Locvar.f90 Maindata.f90 Mathrand.f90 Mr.f90 Read_hh.f90 States.f90 Userparm.f90 Utils.f90 Wrhead.f90 Write_hh.f90	Supervisor add variable subroutine Supervisor error message subroutine Supervisor free memory subroutine Supervisor global variable definitions Supervisor global parameter definitions Supervisor input/output subroutines Supervisor new output page creation subroutine Supervisor locate variable subroutines Supervisor main data variable definitions Supervisor pseudo-random number generator Supervisor master routine Supervisor household read subroutine Supervisor state name/FIPS code definitions Supervisor user-defined parameter subroutines Supervisor utility functions Supervisor header file write subroutine Supervisor household write subroutine
Common\FSTAMP\src (Generic FSTAMP code)	compile.bat Fscnts.f90 Fselgdbg.f90 Fselig.f90 Fslocs.f90 Fsparm.f90 Fsrefalg.f90 Fsrefdbg.f90 Fssetdbg.f90 Fsstats_gl.f90 Fsstats_summ.f90 Fstab_characteristics.f90 Fstab_deductions.f90 Fstab_gl.f90 Fstab_gl_pers.f90 Fstab_gl_st.f90 Fstab_povrat_size.f90 Fstab_protect_ben.f90 Fstab_protect_gl.f90 Fstab_protect_summ.f90 Fstab_summ.f90 Fstab_summ_st.f90 Fstab_welfare_status.f90 Fstab1x.f90 Fstables.f90 Fstamp.f90 Fstbldbg.f90	Compile script Generic FSTAMP counts subroutine Generic FSTAMP eligibility debugging subroutine Generic FSTAMP eligibility subroutine Generic FSTAMP locate variable subroutine Generic FSTAMP parameter file read subroutine Generic FSTAMP reform algorithm Generic FSTAMP reform debug subroutine Generic FSTAMP set debug households subroutine Generic FSTAMP gainers/losers stats subroutine Generic FSTAMP summary stats subroutine Generic FSTAMP characteristics table subroutine Generic FSTAMP deductions table subroutine Generic FSTAMP gainers/losers table subroutine Generic FSTAMP person-level gainers/losers table subroutine Generic FSTAMP state-level gainers/losers table subroutine Generic FSTAMP poverty/size table subroutine Generic FSTAMP protected class benefits table subroutine Generic FSTAMP protected class gainers/losers subroutine Generic FSTAMP protected class summary table subroutine Generic FSTAMP summary table subroutine Generic FSTAMP state-level summary table subroutine Generic FSTAMP welfare table subroutine Generic FSTAMP state-level reform count subroutine Generic FSTAMP table driver Generic FSTAMP driver Generic FSTAMP table debugging subroutine

Folder	Contents	Description
Common\FSTAMP\src modules (Generic FSTAMP modules)	Fscnts.f90 Fslocs.f90 Fsparm.f90 Fsrefalg.f90 Fssizes.f90 Fsutils.f90 Fswork.f90	Generic FSTAMP counts module Generic FSTAMP variable locate module Generic FSTAMP parameters module Generic FSTAMP reform algorithm module Generic FSTAMP sizes definitions Generic FSTAMP utilities Generic FSTAMP working variables module
QC\FSTAMP\src (Db-specific FSTAMP code)	compile.bat Dbasset.f90 Dbcnts.f90 Dbdefine.f90 Dbfsu.f90 dbgencode.f90 Dblocs.f90 Dbparm.f90 Dbpart.f90 Dbvardbg.f90 Dbvars.f90	Compile script Db-specific FSTAMP countable assets subroutine Db-specific FSTAMP counts subroutine Db-specific FSTAMP variable definitions Db-specific FSTAMP unit definition subroutine Db-specific FSTAMP generic code placeholder Db-specific FSTAMP variable locate subroutine Db-specific FSTAMP parameters file read subroutine Db-specific FSTAMP participation subroutine Db-specific FSTAMP variable debug subroutine Db-specific FSTAMP variable definitions
QC\FSTAMP\src\modules (Db- specific modules)	Dbdefine.f90 Dblocs.f90 Dbparm.f90 dbwork.f90	Db-specific FSTAMP variable definitions module Db-specific FSTAMP variable locate module Db-specific FSTAMP parameter module Db-specific FSTAMP working variables module
QC\data_processing (QC file ETL parameters)	00_PARMS.SAS	Parameter file for sas2bin program
QC\Minimodel\sas2bin (convert from SAS7BDAT to BIN format)	Mathpc.hdr sas2bin.sas	Template header file Convert QC SAS7BDAT file into MATH BIN format
QC\Minimodel\tally (BIN file ETL)	Complink.bat dummy.f90 Mathpc.prm tally.f90	Compile script Dummy placeholder subroutines Text file for parameters Perform final edits to QC data for use with Minimodel
QC\Minimodel\Run Minimodel	Complink.bat dummy.f90 Mathpc.prm	Compile script Dummy placeholder subroutines Text file for parameters
